SPECIAL RULES

Breaching Group - p.70

A force that includes a Breaching Group Always Attacks and, if it is an Infantry Company, is considered a Mechanised Company for the purpose of the Armoured Reserves rule found on page 269 of the rulebook. Teams from a Breaching Group may only be held in Reserves in missions with the Mobile Reserves special rule.

Although a Breaching Group is a single Support choice, each Section operates as a separate platoon with its own Command team. The D7 Bulldozer is an Independent Tank team.

An AVRE may attempt to gap an Obstacle. The AVRE must not move in the Movement Step, and must be able to draw a Line of Sight to an Obstacle and be within 4"/10cm of it to attempt to gap it.

Roll a Skill Test for the AVRE in the Shooting Step instead of shooting.

- If the test is successful, the Obstacle is removed (unless it is a Street barricade, in which case it is gapped).
- Otherwise, it remains intact.

Any Armoured vehicle hit by a Petard mortar uses its Top armour rating for its Armour Saves.

At the beginning of the game before Deployment, you may remove any or all AVRE Sections from Breaching Groups, adding a single Sherman Crab Flail tank to the Group's Flail Section for each AVRE Section removed.

At the start of the game after Fortifications (if any) are placed, but before Deployment, you may elect to mount a Fascine or Assault Bridge on any or all of your AVsRE. An AVRE that has a Fascine or Assault Bridge mounted cannot shoot. In addition, an AVRE that has an Assault Bridge mounted is Overloaded rather than Wide-tracked.

Fascines act as Assault Bridges (see page 226 of the rulebook), but may only be used to bridge ditches and craters.

An AVRE may abandon its Fascine or Assault Bridge instead of shooting, removing the Fascine or Assault Bridge from play.

Sherman Crab Platoons use the rules for Mine Flails and Rollers on page 226 of the rulebook.

Teams from all Sections of a Breaching Group are always Non-assaulting teams when involved in an assault. However, a D7 Bulldozer may assault Bunkers as normal.

The Petard mortar shoots as a normal (although very short-ranged) gun.

When determining the number of platoons that must be held in Reserves and the number of platoons Deployed on table, treat each Breaching Group as a single platoon. Each Section of a Breaching Group still Deploys and operates as a separate platoon.

Carrier Platoon (15th) - p.145

Carrier Patrols equipped with Universal Carriers are Reconnaissance Platoons.

Carrier Patrols equipped with Wasp Carriers are not Reconnaissance Platoons.

Carrier Patrols operate as separate platoons, each with their own Command team.

Crocodile Tank Platoon - p.157

Fuel Trailer

Churchill Crocodile tanks are not affected by the Fuel Tanks rule like normal tank flame-throwers. In addition, Crocodile Tank Platoons may not launch assaults, nor may they Counterattack if assaulted.

A force with a Crocodile Tank Platoon may not use the Night Attack special rule. Instead they Always Attack (use page 257 of the rulebook).

Tank Recce Platoon (Second) - p.126

A Tank Recce Platoon is a Reconnaissance Platoon

Tank Squadron HQ (Second) - p.125

A Tank Squadron HQ requires two Churchill V CS tanks to have a 2iC Command team. If a Tank Squadron HQ only has a single Churchill V CS tank, it is just a half squadron and does not have a 2iC Command Team.

Support platoons can be from any division, but all platoons with a Rifle Company division symbol must have the same
